A minimum level of knowledge, access to tools and understanding of safe working practices are required in order to properly undertake a project of this scale. Ensuring that you have the proper knowledge and resources to complete this project is your responsibility. We do not necessarily expect anyone to fully replicate what we have made; we hope it will serve as a useful resource for those undertaking their own journey into the world of plastic recycling.

In saying that, we have learnt so much about plastic recycling, energising a motivated group of students and had a great time along the way too. We encourage anyone who is interested to first consider their expertise and resources, and give it a go!

Let's recycle!
